U Touch Scene Switch

The scenario key is use to perform a scenario at smart home. First, the Smart Myer application set the related events in the scenario by some simple clicking and links the scenario to one of the keys. The scenario keys at portable models can be anywhere due to the presence of internal battery. However, the smart touch scenario keys are like light keys and are place at junction box. The scenario keys are provided in various models.

Go to Device and click on the Master icon that is green.

Adding hardware subscriptions to your master must be done when you are connected to the master through the local network.

Clicking on the master will go to the next page where you will see the hardware added to Master.
